

Dear FCC:

I understand that your agency is considering expanding LPFM stations to take priority over current FM translator service. This action could possibly result in my favorite radio station, K-LOVE radio, being forced off the air. I do not want this to happen. K-Love is the only station that I listen to that is completely Christian and its' programming does not contain any of the junk that is being broadcasted upon the airways these days. It is a service to the community because it promotes love and strong Christian family values. It would definitely be a loss to the community if it were taken off the air. Thank you. Richard
